

# Eradicate Logon Scripts

Logon scripts are often the bane of IT's existence. Multiple setting changes and updates written by multiple owners result in labyrinthine scripts that run slowly at best, causing logons to drag and users to fume. The flexible, rulebased approach of Ivanti® Environment Manager Policy eliminates logon scripts and substantially reduces logon times. IT and users – fume no more!

## Time + Complexity = Longer and Longer Logons

Logon scripts are a necessary evil for IT. They have long been used to configure user desktop settings at logon but quickly become large and convoluted due to setting changes and updates. Another complicating factor is that logon scripts are generally maintained by multiple owners and rarely receive an overhaul, so they continue to grow in size and complexity.

As complexity builds, logon scripts run slower and slower, forcing users to wait longer and longer for the logon script to finish running and their desktop to appear so they can begin working. Ivanti has worked with many organizations where unwieldy logon scripts forced users to wait as long as five to 10 minutes to begin working – a significant hit to productivity.

## Apply Policy Only When Needed

Environment Manager Policy's multi-threaded, contextual engine is optimized to apply only those configurations that are relevant to the user context, to get them done quickly, and to prevent hold-ups to the logon if, for example, a network resource is unavailable. Its flexible, rule-based approach reduces logon times substantially and transforms the user experience from frustrating to productive.

## No Additional Infrastructure Required

Environment Manager Policy requires no additional server or database infrastructure to install and run – simply deploy agents to endpoints, install the console, and start applying policy based on user actions and context.

Environment Manager Policy is an excellent addition to Microsoft System Center Configuration Manager (SCCM), enabling SCCM admins to push policy configurations to users from the SCCM console and provide unprecedented control over the user desktop environment. In addition, management packs are available for System Center Operations Manager (SCOM) to alert IT in the event that logon actions are not applied as expected.

## Get a Free Trial and Fast Start

Free 30-day trials of Environment Manager Policy are available from your Ivanti sales representative, or request a free trial at [www.ivanti.com/EMPO\\_trial](http://www.ivanti.com/EMPO_trial).

## About Ivanti

Ivanti makes the Everywhere Workplace possible. In the Everywhere Workplace, employees use myriad devices to access IT networks, applications and data to stay productive as they work from anywhere. The Ivanti automation platform connects the company's industry-leading unified endpoint management, zero trust security and enterprise service management solutions, providing a single pane of glass for enterprises to self-heal and self-secure devices, and self-service end users. More than 40,000 customers, including 78 of the Fortune 100, have chosen Ivanti to discover, manage, secure and service their IT assets from cloud to edge, and deliver excellent end user experiences for employees, wherever and however they work. For more information, visit [ivanti.com](http://ivanti.com)

The Ivanti logo consists of the word "ivanti" in a bold, lowercase, sans-serif font. The letter "i" is red, while the remaining letters "vanti" are black. A small registered trademark symbol (®) is located at the top right of the letter "i".A vertical bar on the right side of the page, transitioning from red at the top to orange at the bottom.
